

Instructions

This based on user having some basic Django experience

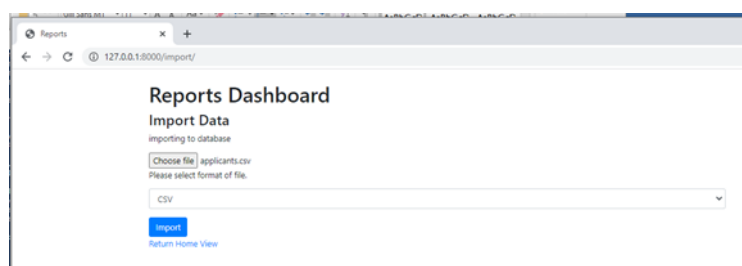

Import all of the files

- 1) Create the SVM model to be pickled
 - a. ***predicting model.py***
- 2) In the commands line (where manage.py is stored)
 - Python manage.py migrate
 - Python manage.py createsuperuser
 - Python manage.py makemigrations
 - python manage.py migrate --run-syncdb
 - Python manage.py runserver

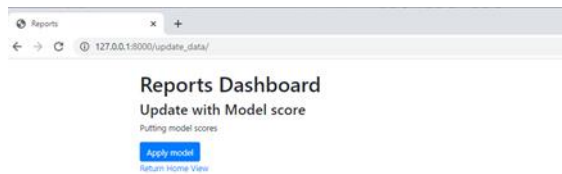

- 3) Goto the Django page

- 4) Click '>>Import Data'

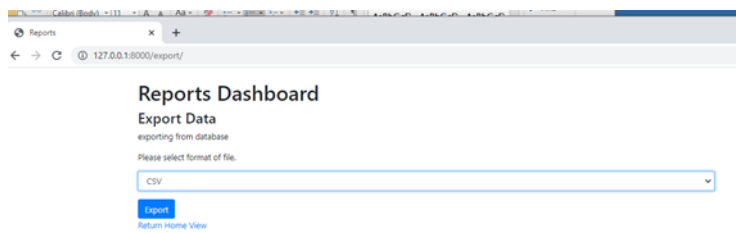

- 5) Import applicants.csv
- 6) Return to home page
- 7) Click in **Update data**

8) Click on **Return to Homepage**

9) Click on **Export data**

Click Export and you will receive your CSV file with the population **scored**

If you want to delete all of the data afterwards, return to Homepage and use the **delete data page**.
